Division of Philosophy, Art and Critical Thought
August Session / August 12–14 2019

Infinity, Nothingness, and the Un/doing of the Self

This course invites us to think together about decolonial and deconstructive possibilities in their materiality, especially the themes of multiplicity, difference, infinity, nothingness, justice and force. During our three-day class time together we will focus on the themes of borders, entangled colonialisms, and radical hospitality, in relationship to physics and its conceptions of space, time, matter, and the void.
